Relevant Experience

Full Stack Developer

DentalQore | October 2022 – March 2024
PHP, JavaScript, SQL, Git, OOP, Testing

- Made substantial contributions to the frontend and backend of multiple large progressive web applications, used by Dentists across the country.
- Built and maintained robust, scalable, secure, and maintainable APIs.
- Created and updated frontend pages and components to work with new and previously created APIs.
- Quickly became proficient in the company's proprietary backend and frontend frameworks.
- Co-conducted meetings showcasing new features with the CTO.
- Solved bugs reported by support teams.

App Support

DentalQore | June 2022 – October 2022

- Handled client bug reports, feedback, and requests relating to the client facing application through phone and email.
- Would troubleshoot and report bugs to the development team.
- Communicated with executives in meetings on prioritizing bugs, areas of improvement, and client feedback.

Tech Support (Entry Level Web Developer)

DentalQore | February 2022 – June 2022
WordPress, CSS, JavaScript, HTML

- Created and updated web pages for clients based on their requests. Some examples are; updating the design of a page or global components such as the header or footer, creating image galleries, fixing bugs, and adding contact forms.
- Handled phone calls and emails from clients in a friendly and professional manner.

Education

Davis Technical College | March 2017 – June 2020
Web Development – Certificate of Completion
